About

I am open to continuous learning, have an analytical mindset and a team-oriented structure. I have received positive feedback with my solution-oriented approach and communication skills in projects I have worked on both individually and as a team. I want to further develop these qualities in a position where I can create value in the field of software development.

Experience

EtrSoft
Fullstack_Web Developer

Istanbul
September 2024- January 2025(Remote)

- I have worked on frontend designs in projects using technologies and libraries such as React.js, Material UI, and RESTful APIs, and I have improved myself in this area.
- I have developed backend projects using Node.js, PostgreSQL, and Python and worked with database schemas.
- I used Axios and the Linux terminal to establish frontend-backend connections through SSH and Reverse Proxy technologies, ensuring the project runs properly on the server.

Hacettepe University Yaşam Boyu Öğrenme Merkezi
Graphic Designer

Ankara
October 2022- June2024

- I designed posters and content for upcoming training sessions using Adobe Illustrator and Adobe Photoshop.
- I served as a technical coordinator in organized meetings, resolving participants' technical issues.

Tutor
Mentor

Ankara
October 2021- January 2024

- Private mathematics lessons for primary and middle school students.
- Preparing lesson plans, study schedules, and learning programs for students of all age groups.
